

# Sageful Solutions

Sageful Corporation provides a wide range of drug testing data management solutions. From streamlined to comprehensive, from traditional Windows to web-based, Sageful has a solution that is right for you. Sageful's efficiency-enhancing solutions create powerful command centers where criminal justice, workplace, laboratory, and medical users can collect, track, analyze, and securely exchange client information making their community or workplace a safer, more productive place:

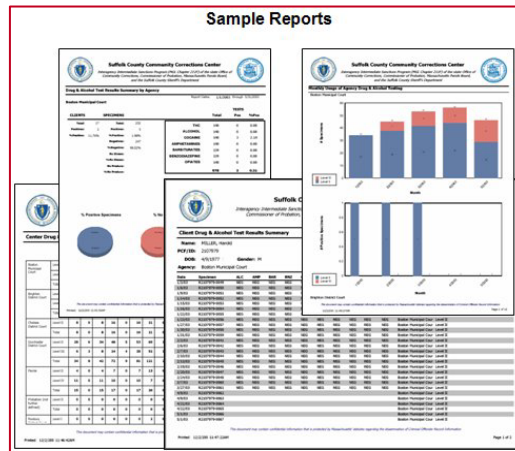

- **TrackMyResults™**: a web-based suite of easy-to-use and easy-to-adopt services that manage drug testing programs. With TrackMyResults there is no software to purchase, nothing to install and no need to call MIS. TrackMyResults keeps information confidential while making it accessible. And its pay per use model means there are no large, up front, capital expenses nor recurring support and maintenance charges. The three TrackMyResults service offerings—*Lite*, *Essential* and *Production*—provide increasingly valuable levels of drug testing data management power.

- **DAT Information Manager™**: a comprehensive Windows-based solution for drug and alcohol testing programs with extremely robust chain of custody functionality that minimizes legal liability.

- **Attendee Information Manager™**: a comprehensive solution for drug courts, reentry programs, community corrections, probation, and parole that manages cases and drug test specimens, results, and schedules; generates regulatory and analytical reports; automatically alerts responsible parties when critical events occur; creates class and individual schedules; takes attendance; records chain of custody evidence; and more.

## Customer Benefits

- **Improved outcomes.** When up-to-date, comprehensive client information is easily available, employees are empowered to make better decisions. When staff are informed and empowered, client outcomes improve.
- **Increased program efficiency.** Automating error-prone, repetitive, manual tasks—from collating disparate data to writing reports to scheduling tests—saves significant time while reducing error. Especially cost effective is Sageful Solutions' ability to electronically process drug testing information automatically. Employees can spend less time with paperwork and data entry and more time with clients.
- **Demonstrable return on investment.** Claims of improved outcomes and increased program efficiency are easy to substantiate when clients are carefully tracked and analytical reports easily generated. And when you can demonstrate to budget setters the positive return you attain on their investment, funding decisions become easier.

- **Improved communication and collaboration.** Sageful Solutions are designed for today's collaborative, multi-disciplinary environments. They enable secure, confidential sharing of information and play a critical role in bridging the information gap that often exists within and between organizations.

- **Increased employee accountability and legal defensibility.** While Sageful Solutions' ability to bridge communication gaps and empower employees is quite compelling to most staff, its built-in accountability mechanisms help ensure that everyone is similarly motivated.

## The Bottom Line

Sageful Solutions are quick to deploy, easy to use and provide complete, legally defensible client information management. Sageful increases operational efficiency, reduces program risk, and improves client outcomes.

CLIENT INFORMATION MANAGEMENT.  
IMPROVING OUTCOMES. SAVING MONEY.
